"Catch All" for anything that doesn't have enough content for it's own "Book"

- [Interesting YouTube Channels](#)

Interesting YouTube Channels

In no particular order, some great content creators recommended by multiple people in the community

Robert Murray-Smith is an enthusiastic teacher of anything that interests him, and he breaks things down to pieces that are easy enough for even children to understand fairly complex subjects.

<https://www.youtube.com/@ThinkingandTinkering>

LockPickingLawyer is a very accomplished demonstration lock picker that thoroughly explains what he is feeling or looking for while working.

<https://www.youtube.com/@lockpickinglawyer>

BlondiHacks is run by Quinn, a clever engineer and machinist that teaches a lot of interesting mechanical projects.

<https://www.youtube.com/@Blondihacks>

MyTechFun is run by Igor, a very thorough and methodical engineer that does occasional materials testing relating to 3D printing.

<https://www.youtube.com/@MyTechFun>

Slant 3D is a 3D print manufacturer that teaches about the methods to design for and advantages of 3D printing.

<https://www.youtube.com/@slant3d>

TechMoan demonstrates and explains the history of tech items and technologies from the past.

<https://www.youtube.com/@Techmoan>

Stephan from CNCKitchen is a materials engineer that does some very interesting testing.

<https://www.youtube.com/@CNCKitchen>

SaveItForParts is a great experimenter that does a lot of radio related research and tinkering.

<https://www.youtube.com/@saveitforparts>

SilentButDescriptive demonstrates handcuffs and restraints from around the world.

<https://www.youtube.com/@SilentButDescriptive>

AppliedScience teaches a great variety of different concepts and technologies.

<https://www.youtube.com/@AppliedScience>

TeranAtelier is a master leather worker that teaches in a way that anyone can understand.

<https://www.youtube.com/@TeranAtelier>

ScamSchool is run by magician Brian Brushwood, and teaches magic tricks and other fun "scams" to play on friends.

<https://www.youtube.com/@scamschool>

Peter Brown is a craftsman that uses epoxy, wood, and everything else to make some real works of art.

<https://www.youtube.com/@peterbrownwastaken>

Tim Hunkin is an engineer and mechanical artist that creates unique "arcade" games for his public arcade in the UK.

<https://www.youtube.com/@timhunkin1>

TechIngredients teaches and explains the science behind some really neat projects.

<https://www.youtube.com/@TechIngredients>
